

CANTILEVER SYSTEM

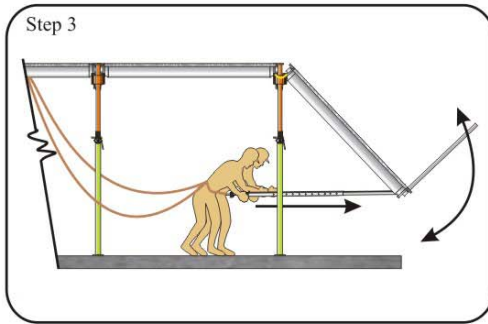

Launching the Cantilever

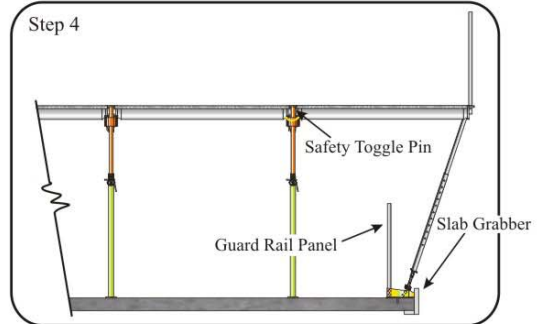

Step 1
Hang panel in vertical position and install safety chain (2 per panel) through accessory holes between vertical panel and horizontal panel.

Step 2
Install Cantilever Mounts, Cantilever Posts, Cantilever Shoes, Cross Brace, and upper Guard Rail Panel.

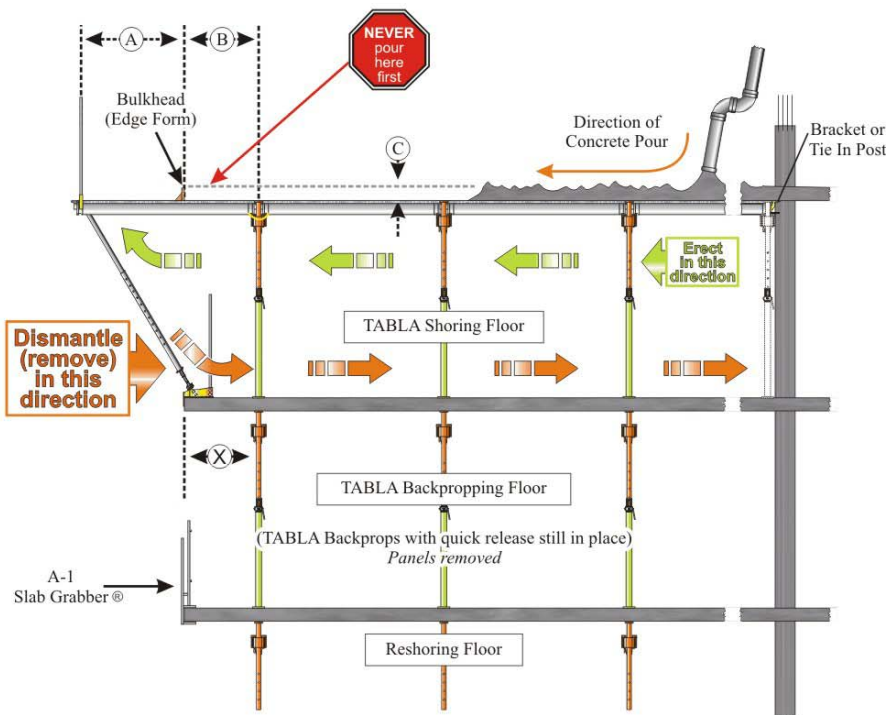

Step 3
After tying off for personal protection, rotate panel into horizontal position using Cantilever Posts as erection staff.

Step 4
After Cantilever Shoe is on slab edge, install lower Guard Rail Panel, Slab Grabber Assembly and Safety Toggle Pin.

Cantilever Procedures

For dimensions, A, B, C & X see your layout drawings

Cantilever Stripping Procedure

- Leave safety chains in place and remove Safety Toggle Pin. Release the Load Support Key using the ADT Tool and drop the panel
- While being tied off with your Safety Lanyard remove lower Guard Rail Panel
- Free Mounting Shoe from slab
- Using Cantilever Post rotate Panel downward into the vertical position
- Remove remaining Cantilever Components and recycle to next floor
