

# STRIPPING

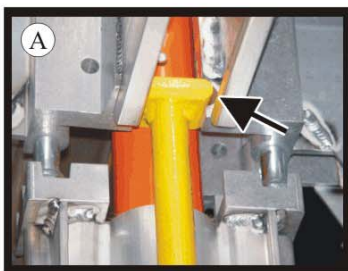

Follow below guidelines for stripping Panels

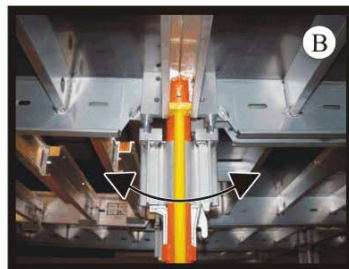

**TABLA Panels have been stripped at up to 650sq ft/60 M<sup>2</sup> per man hr**

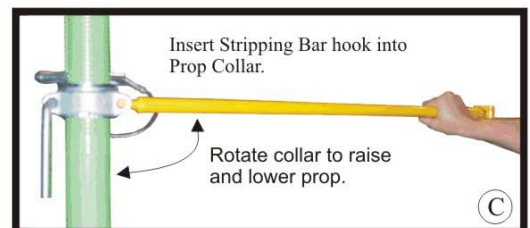

The TABLA Stripping Bar is a multi use tool, which can be used for the release of surface tension between the Panel Deck and the underside of the slab (see images A & B). Stripping Bar can also be used as a “cheater bar” on collar of prop. (see image C)

Insert bar into notches on corners of panels.

Rotate bar to release surface tension
